

# CLOUD FOUNDATIONS

**GET YOUR HEAD INTO THE CLOUD WITH A TRUSTED CO-PILOT.**

Public cloud offers new capabilities for an organisation such as agility and resource elasticity. When managed well, with a Cloud Centre of Excellence a business can accelerate the use of digital in their market for a competitive advantage. Cloud Foundations is about moving your business forward and delivering tangible value.

Our Cloud Foundations package offers organisations the opportunity to hook into a well managed public cloud.

## **COST VISIBILITY**

The cloud financial office is a key aspect of well managed public cloud. Using industry leading tools, we provide insights to optimise costs ensuring your business is paying for what you need, and nothing you don't.

## **CLOUD SECURITY**

The inbuilt security controls public cloud provides are maximised with complementary tools and management - defeating the complexity that come with native access-control-lists.

## **CLOUD NATIVE MONITORING**

We leverage APIs to monitor traditional server resources, as well as microservices to provide comprehensive visibility of the performance of your services.

## **CLOUD AUTOMATION**

Automating tasks in public cloud reduce manual tasks, saving time and reducing human error. We provide basic automation to turn off resources when not needed and schedule backups.

## **CLOUD DASHBOARD (OPTIONAL)**

Achieve complete visibility across your cloud platform. Monitor and benchmark activity, events and security with built in analytics, and custom dashboards designed for your business.

# WHAT WE OFFER

## CLOUD AGNOSTIC

At the heart of the Cloud Centre of Excellence is a finance function. We support your team to manage and minimise costs ensuring the most economic use of cloud.

## CLOUD CO-PILOT

Controlling resource consumption can mean introducing business processes that forego benefits of cloud. With the right visibility and alerting, teams can operate agilely without risk.

## CHATOPS

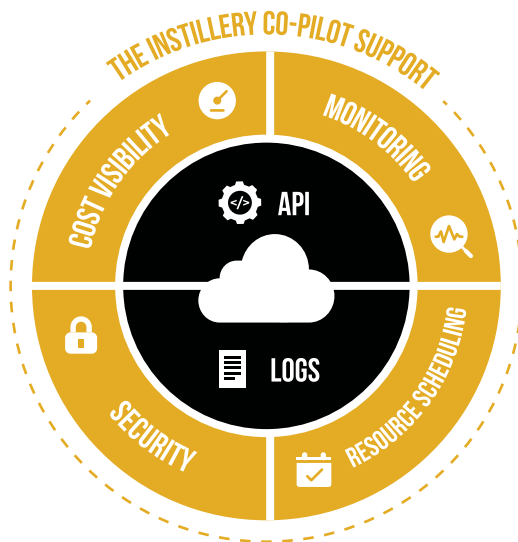

We make it easy for you to contact us, with integrated chatops support acting as a direct line to our team of public cloud specialists. We also offer traditional means of contact.

## FUTURE PROOFING

Collectively plan each quarter and agree upfront what outcomes we'll target to ensure your organisation extracts the most value from cloud.

## ELASTIC TEAMS

As a Cloud Foundations customer you'll benefit from priority access to our team. Resource your next project or initiative with our cloud infrastructure, security, connectivity, devops and CI/CD development capability.

**The Instillery is a leading NZ based public cloud service provider. If success in the public cloud is a priority for your business, let us support your objectives and make your cloud journey a success.**
